

EXPERIENCE

Susan Leese

Dogs are my passion and I believe that education is the way to responsible dog ownership and good canine citizens.

For 30 years I have been raising, training, showing and breeding Golden Retrievers. I started teaching puppy kindergarten classes in the mid-80's with a local dog club. I've owned Norwegian Elkhounds, Old English Sheepdogs, Flat Coat Retrievers and Petit Basset Griffon Vendeen (PBGV) as well. Personally raising over 50 puppies to adulthood, my real experience comes from helping hundreds of new pet owners.

Twelve years working at a veterinary hospital and living with dogs my entire life, has allowed me to fully understand dog behavior. I have insight on how dogs think and react. Once you learn how dogs communicate, it will be much easier for you to communicate with them.

I will to teach you the tricks of the trade I've learned that will make your life easier when you bring a puppy into your home.

Each and every puppy arrives as a blank slate. I can give you the information you need to raise a pet that is a joy to have in your home for their lifetime.

Westminster Kennel Club 2001

PUPPY TRAINING

Training essentially begins the minute you bring your puppy home. During the first six months behavior problems can develop, if left uncorrected, can last a lifetime. By using gentle training methods we can guide your puppy in the right direction, avoiding many of the problems that could develop.

Within a few sessions be on your way to raising a well behaved pet partner and loving family member.

NEW PUPPY ABC BASICS

House training, basic obedience, nutrition, grooming, health care, socialization and puppy proofing.

Package price based on your need. Includes both private lessons and phone consultations. Initial consultation included.

SOLUTIONS

Bringing a pet into the household does not need to be disruptive. We start with a plan to maintain a safe, healthy environment. Puppy proofing your home and yard will provide you with the information to successfully cohabit.

Handle lifestyle changes when a new baby enters the home easily. It will be an adjustment for your pet too.

Traveling with your pet can be quite enjoyable. Learn ways to make your trip safe and fun for both you and your pet.

Solutions can be as simple as 1 or 2 sessions!

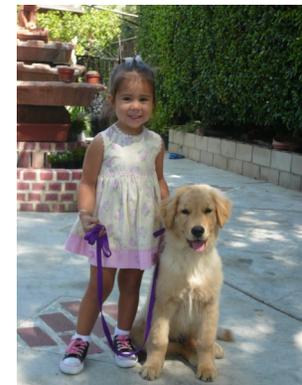

BEHAVIOR PROBLEMS

Stop bad habits like chewing, jumping, counter-surfing, digging or barking. Solve house breaking issues. Find solutions for separation anxiety, thunder-storm fear, or aggression.

Some behavior problems may require multiple sessions.

Every program is ***"tailored"*** to the special needs of each dog and their owner.

Personal dog training in the ***comfort of your home,
on your schedule.***
